CSA1515 CLOUD COMPUTING

Lab programs EXP :18-22

NAME: Pragadish R

REG.NO: 192572030

18. Install Virtualbox/VMware Workstation with different flavours of linux or windows OS on top of your present windows environment.

Create two vms (ubuntu 26, ubuntu 24)

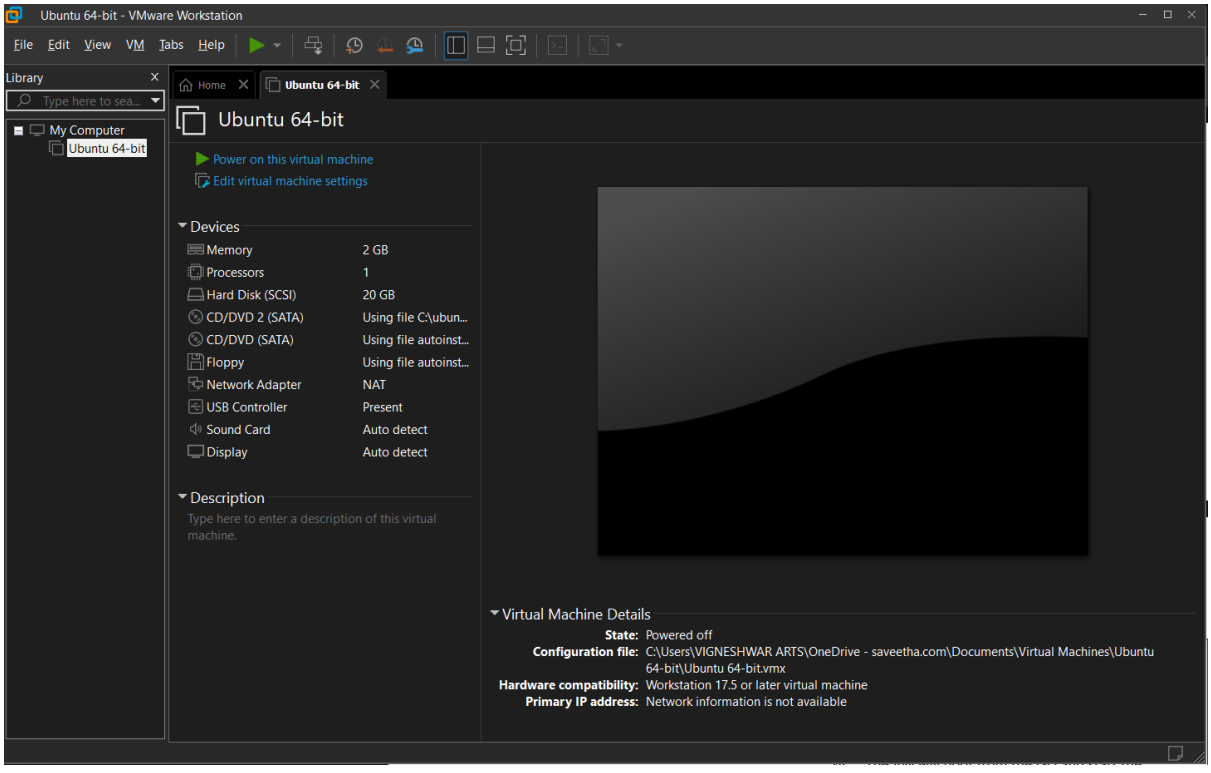

AIM:

To create Virtualbox/VMware Workstation with different flavours of linux or windows OS on top of your present windows

environment.

Create two vms (ubuntu 26, ubuntu 24)

IMAGE:

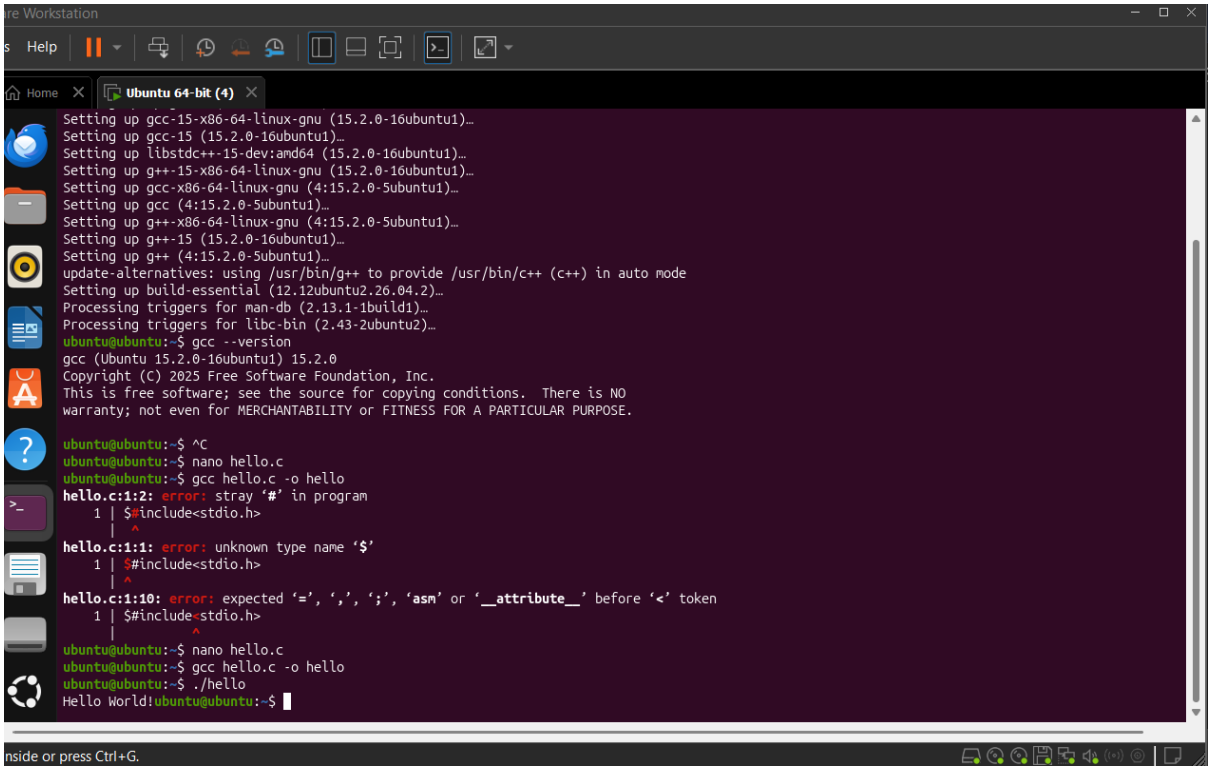

19. Install a C compiler in the virtual machine created using virtual box / VM Ware Workstation / Player and execute Simple C Programs.

AIM:

To Create and Install a C compiler in the virtual machine created using virtual box / VM Ware Workstation / Player and execute Simple C Programs.

IMAGE:

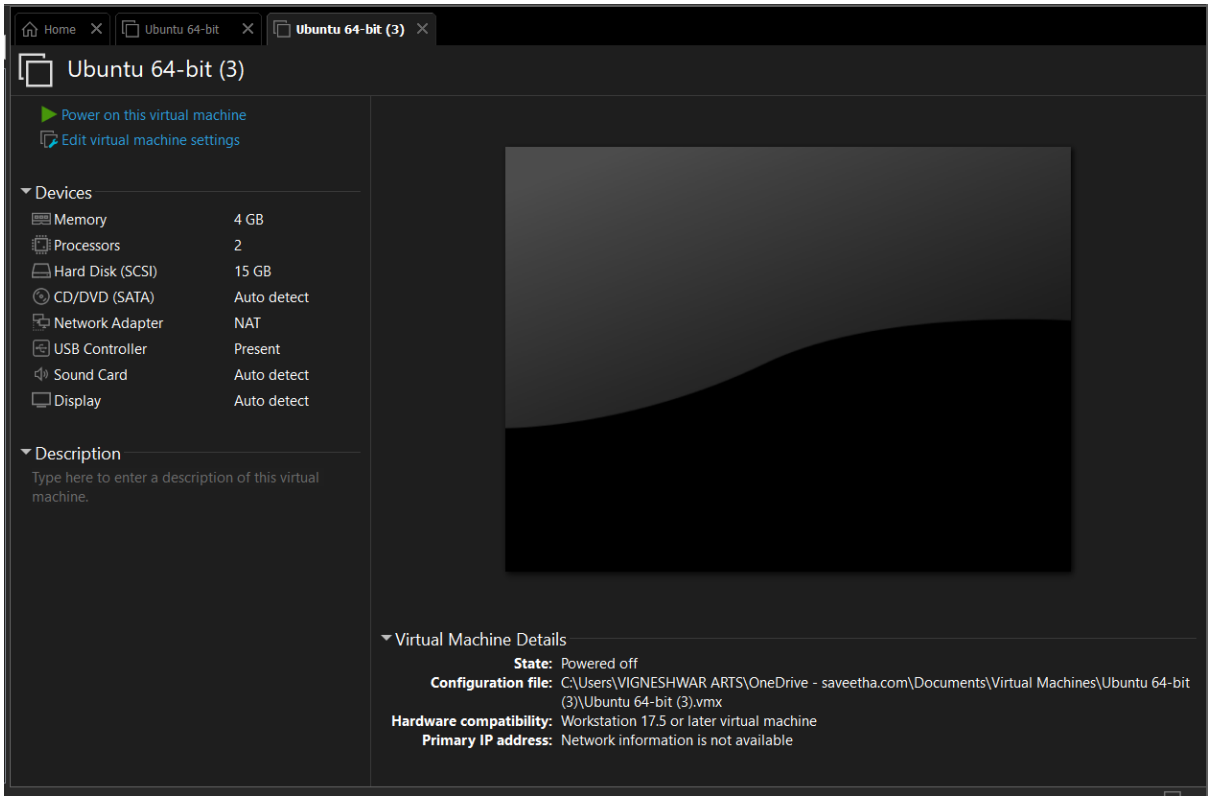

20 & 21. Install Virtualbox with different flavours of linux or windows OS on top of windows 10 using custom installation.

AIM:

To Install Virtualbox with different flavours of linux or windows OS on top of windows 10 using custom installation.

Virtual Machine Details
State: Powered off
Configuration file: C:\Users\VIGNESHWAR ARTS\OneDrive - saveetha.com\Documents\Virtual Machines\Ubuntu 64-bit (3)\Ubuntu 64-bit (3).vmx
Hardware compatibility: Workstation 17.5 or later virtual machine
Primary IP address: Network information is not available

22. Create a Snapshot of a VM and Test it by loading the Previous Version/Cloned VM.

AIM:

To Create a Snapshot of a VM and Test it by loading the Previous Version/Cloned VM.

PROCEDURE:

• Open VMware Workstation.

• Start your Virtual Machine and make sure the guest OS is working.

• Create a Snapshot

• Go to VM → Snapshot → Take Snapshot.

• Enter a name, e.g., Before Changes.

• Click Take Snapshot.

• Make Changes to the VM

• Create a new folder/file.

• Install a small application or change a setting.

• This represents changes made after the snapshot.

• Test the Snapshot

• Go to VM → Snapshot → Snapshot Manager.

• Select Before Changes.

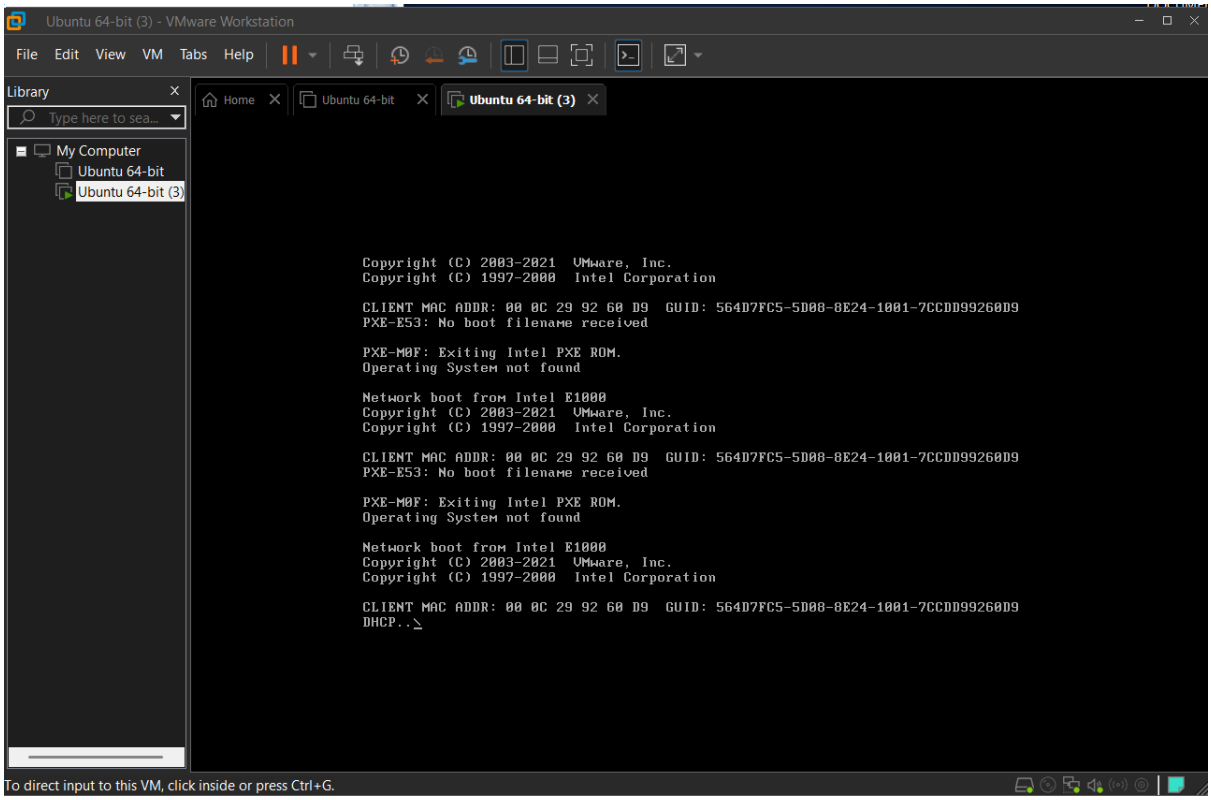

• Click Go To / Restore.

• Confirm the Previous State

• Start or restart the VM if required.

• Check whether the changes made after the snapshot have been removed.

To direct input to this VM, click inside or press Ctrl+G.

23. Create a Cloning of a VM and Test it by loading the Previous Version/Cloned VM

AIM:

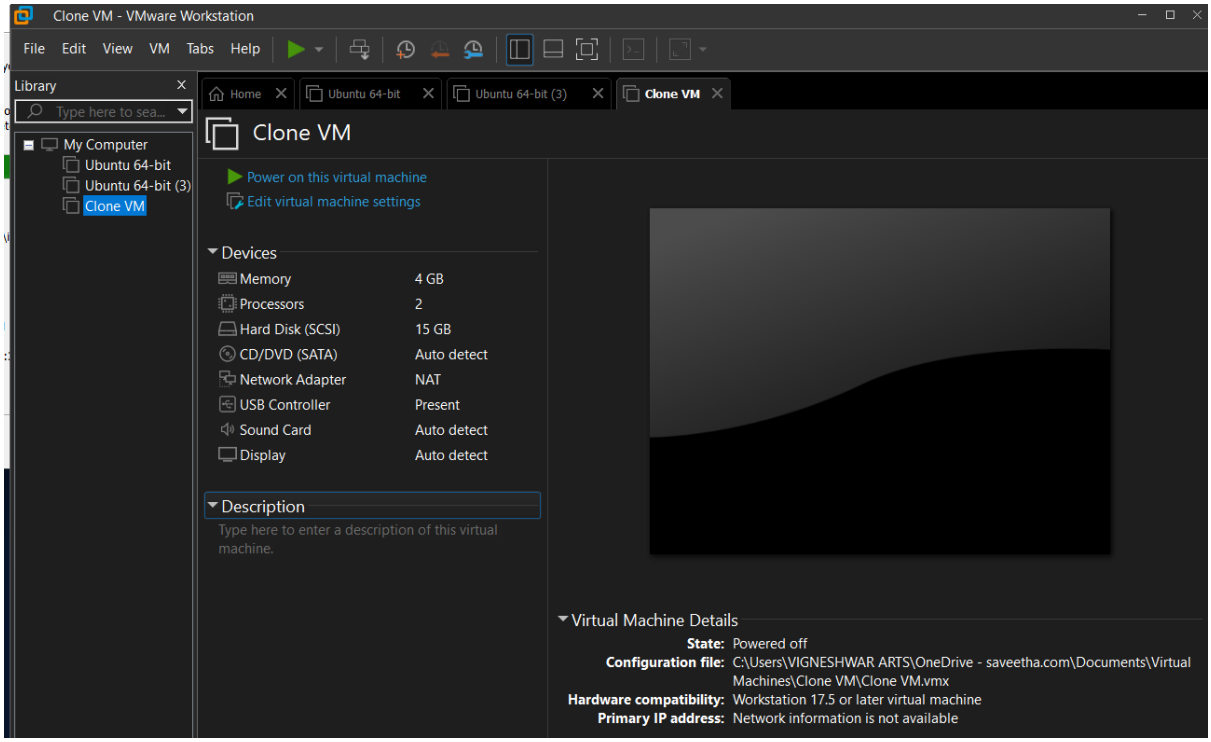

To Create a Cloning of a VM and Test it by loading the Previous Version/Cloned VM

PROCEDURE:

Clone the VM

1. Power off the VM.
2. Go to VM → Manage → Clone.
3. Select the snapshot as the cloning point.
4. Choose Create a Full Clone.
5. Give the cloned VM a new name.
6. Click Finish.
7. Start the cloned VM and verify that it contains the previous VM state.
